

PLASMINOGEN ACTIVATOR VARIANT FORMULATIONS

Abstract of the Disclosure

5 A solution is provided comprising about 0.01 - 0.05 mg/mL
of tenecteplase in sterile water for injection or
bacteriostatic water for injection and normal saline. Such
solution is useful for delivery from a catheter and for
treating a thrombotic disorder by exposing fibrin-rich fluid
10 from the disorder to an effective amount thereof, as well as
in kits. In a preferred embodiment, peripheral thrombosis is
treated in a mammal comprising delivering to the mammal via a
catheter an effective amount of this solution.
